# Celebrating Over 100 Years

## Why Choose Forsythe?

- Quality Products / Service Oriented
- ISO 9001 / TS 16949 Certified
- Full Lubricant Lab on Site
- Emergency Services 24 / 7 / 365
- Experienced Team Ready To Meet Your Needs

## Value Added ► Services Added

- Testing In-Use Fluids and Giving Recommendations (Increasing Fluid & Machine Life)
- Ability to Reverse Engineer Products
- Inventory Control - "One Stop Shop"
- Problem Solving

## Environment & Safety

- Environmentally Approved Products (Supports ISO 14001)
- Fire Resistant Fluids

"This is to recognize that Forsythe Lubrication Associates Ltd., has been providing OPG (Ontario Power Generation) with fire resistant hydraulic fluid (FRF) and timely analytical and purification support to maintain Darlington FRF chemistry in the best condition for optimum operation. Successive Forsythe Lab Managers including the present Lab Manager have been more than accommodating to our needs which is greatly appreciated. In my opinion, Forsythe has provided prompt response to customer needs and has made themselves OPG's supplier of choice more for than a decade and we are looking forward to enjoying mutual co-operation and interest for decades to come."

*Ezzat Ghanbari - Senior Technical Engineer -  
Chemistry Tech. Unit - Darlington Ontario Power Generation*

## FORSYTHE QUALITY POLICY

Forsythe Lubrication is characterized by our commitment to service and quality products. We are committed to comply with, or exceed, the requirements of our customers and the requirements of ISO 9001:2000 and TS 16949:2002 where applicable to our business.

Our commitment to quality, product safety and profitability in the field of blending and packaging of lubricants and functional fluids provides the tools to grow our business.

The quality and support of our suppliers is a cornerstone to the success of our business.

A win-win philosophy applies to all our corporate dealings.

Our Quality Management System will be focused on meeting customer stated requirements and continually developing system improvements that benefit both the customer and Forsythe. These improvements will be made by achieving defined corporate objectives.

Deanna Forsythe  
President
